ABSTRACT:

PROBLEM TO BE SOLVED: To provide a blackout curtain that has no pinhole and has the light-shielding effect so that the light transmission illuminance may be lower than a prescribed value.

SOLUTION: Polyolefin flat yarns are used as warp and weft and the resultant flat woven cloth is used as a base cloth. On one face of the base cloth, a polyolefin laminated layer including a light-reflecting pigment is laminated, while another face is laminated with a polyolefin laminated layer including a light-absorbing pigment. The resultant sheet has a light

transmission  
luminance of
